IV Writing Topic E

We all have our in this life. Someone wants to be a doctor, another one wants to find love, and I want to create my own career. In my opinion, it is important that people choose a career when they are still quite young because it's the best time to find your way. When you are a student an adult. At these period of your life you will be able to do more things, you have more time and have your dreams, ideas, opinion. Although when you are studying at the university you will be able to do what you want. Freedom is every where and in everything and it is not necessary to ask your parents' permission. You will not be able to anything, if you don't choose career you need especially you are still young. Retired people don't able to do some things, even if they have more time. So you should study and get knowledge use your time profitably. Get knowledge, study, practise and travel when you are young.

In conclusion, it's the best choice to choose a career and find your own way when you are young. You must decide who you are going to be in the future. Profession also plays a huge role in your life. Rightly chosen career is the best step happiness. Follow the rules, discipline and come true.

This happened two years ago. I had a friend named Tom. We were very close since our childhood. His family also lived in our village and obviously we went to the same school, because village is not that big and it is enough for children in our village. As I mentioned before we were very close with Tom, but time by time he found new friends and me too. I noticed that he had changed a lot, especially his behaviour. In short he became rude and unrespectful. The Tom I knew was different. But what to do with it. I got used to it. But something changed his behaviour. That day, two years ago, it seemed was very simple. However I heard that night something bad. Tom got into a bad deal with his friends. They were drunk and got into a car accident. He woke up after a long rehabilitation and he realized that he has done. Happily nothing happened to his health. And luckily he survived. After that, Tom promised himself that he would never make the same mistake again.

Because now most teenagers don't want take education and lawing, they want only enjoyed at young life. There are teenagers who believe theyr money and think buy all things. I think that it isn't important that people choose a career when they are still quite young. I'm also young. And I don't know what I want.

In my opinion when people young, they need to more practice in order to know which they want. If they'll choose a career when they are still quite young, they would make more mistake. Of course it's need to make mistakes due to practice.

Finally it is not important that people choose a career when they are young. It is my opinion.

Writing.

In today's world, it is believed that people should choose a career when they are still quite young.

The main advantage choosing career at young age is to be independent when it comes to finance. Because there are a lot of people who didn't choose a career. As a result, they rely on others. For example, overindulged child who think, all people must to do what they want and allow them to act freely, will have negative impact to others.

Other benefit is there won't be any regret about not trying something when person get old. People who get married at younger age instead of choosing carrier, often feel sad about. Because after marriage, they life achievements, goals turning into chores. However, each person has own destiny and decisions. In my point of view, it is better to education. Because knowledge is the only thing that nobody can take it from you. Moreover, in 21st century, knowledge can decide everything.

In conclusion, it is important that people choose a career at young age due to many situations.

Topic 6.

It is important that people choose a career when they are still quite young. Because when you are young ~~to~~ you are filled with energy. Young people tend to be more active and it is easy for them to accept the given information. Thanks to the fresh brain that younger people have they can achieve the dream career they want. For example, by thinking harder and clearly they know how to deal with certain problems. And the problem-solving is a skill which is required in many professions. That's why it's important for them to start a career at a young age. There are lots of opportunities to get successful when you are young, rather than when you are in your 40's. When you are old it is hard for you to achieve something you want. Because there will be not enough sources to get that. Therefore, having and choosing the career way at an young age doesn't sound bad. It would be a great decision to follow that way, so when you are old you could thank yourself for doing it and never giving up.

Writing (C) letter

Good morning! I am Kopbay Sagida and I recently saw an announcement in an English-language magazine and now I am writing a letter to you. If I was an interviewer, I would want to take an inter-

view from I Napoleon, I mean Napoleon Bonapart. I know that he is not alive and it is not (im)possible to take an interview from him. But I really wanted to take an interview from Napoleon. Napoleon Bonapart is an imperator with great mind and brave soul. But why I want to take an interview exactly from him? There is a many big people like him. I think the reason is obvious. He was not an imperator's or monarch's son but a simple, ordinary genetal of France. And so he became (a big person, not only France's, but world's. I have so many questions for him. I would as how he became an imperator, how he created plans for figh such a big places and very important question: Why his powerfull imperior has failed? If only I had a chane to interview him.

Thank you for your time, I hope you will publish my letter! Have a good day!
